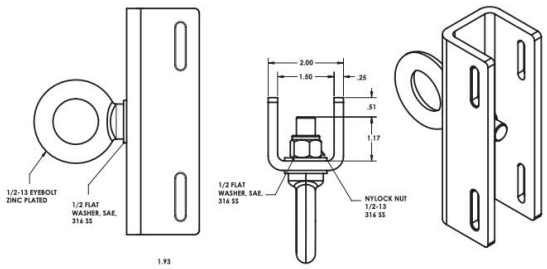
SAFETY ANCHOR / PM-SAFETY-6DOWN-G:

When the pole or column does not offer an adequate way to attach safety cables, specify the PM-Safety-6Down-G and corresponding band kit. This mount provides a structural method for anchoring safety cables. It installs above the pole adapter. Safety cables are then secured to the safety anchor and each loudspeaker, thus by-passing the pole adapter completely.



SUPPORT ARM / PM-SA-24:

The PM Series Support Arm is produced from rugged tubular stainless steel in a natural finish and supports the stated working load of the selected pole adapter. Three different mounting holes allow for placement relative to the pole to allow clearance for tilt rotation. Decorative hole covers provide a finished look and stainless hardware is included to secure Yoke and U-Bracket style mounts.
