

# BC3-7J

# 1130 lb WLL

## SCISSOR STYLE BEAM CLAMP

## BeamWare™

Eyebolt is sold separately.

### SUSPENSION AND AIMING FOR TWO CABINETS

Creating suitable overhead structural suspension points for rigging systems can be difficult so using the building's own structure can provide more options for the installer. Standard, pre-engineered beam clamps attach to the building's beam structure and offer an easy, safe and predictable method of suspension.

This unique beam clamp actually gets stronger as more weight is applied.

### STANDARD FEATURES:

- ▶ Scissor clamps stronger as the applied load is increased.
- ▶ Infinite width adjustments from 3" - 7"
- ▶ Accommodates 1/2"-13 threaded rod or eyebolt for suspension.
- ▶ All grade 8 hardware
- ▶ Ideal for permanent or temporary suspensions.

### OPTIONAL ACCESSORIES:

- ▶ See Threaded Rod Datasheet
- ▶ See Strut Accessories Datasheet
- ▶ See Eyebolt Datasheet

\* Not for human suspension

### SPECIFICATIONS:

**Part Number:** BC3-7J

**Materials:** Stainless and Galvanized Steel Components

**Width:** 3" to 7" / 76mm to 178mm

**Color:** Grey

**Design Factor:** 5:1 ratio

**Working Load:** 1130 lb. / 514 Kg. WLL (Vertical)

**45 DEG. MAX WL:** 620 lb. / 295 Kg.

**Do not side load beyond 45°**

MADE IN USA

Rated for indoor use.
