

FP-AM4212-2X1

(400 lb. WLL)

CLUSTER PACK PLANAR ARRAY KIT

FASPAC™

Clustering and flying AM4212, AM5212, AM6212 & AM7212 series loudspeakers is easy, safe and very predictable. This planar array suspension kit joins two cabinets together to be flown as one, tight-packed for near field placement or splayed out for further distances from the audience.

Two top plates and two bottom plates are included in the kit along with load rated eyebolts that anchor into the speaker's rigging points and provide the actual suspension. High strength bolts are provided to secure the joiner plates.

SPECIFICATIONS:
