

# FP-SLS920

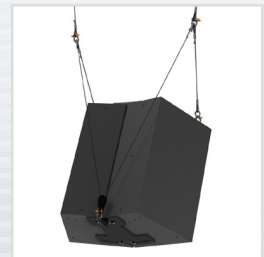

(400 lb. WLL)

CLUSTER PACK PLANAR ARRAY KIT

FASPAC™

Clustering and flying SLS920 loudspeakers is easy, safe and very predictable. This planar array suspension kit joins two SLS920 cabinets together to be flown as one. Multiple attach points allow them to be tight-packed for near field placement or they can be splayed out for more distant audiences. A single top plate and bottom plate with a pullback point make up this kit along with load-rated eyebolts that serve as the suspension points from the cabinet's internal braces. High strength bolts are provided to secure the joiner plates to the speakers.

## SPECIFICATIONS:

**Material:** Structural Steel Alloy

**Finish:** Powder Coat

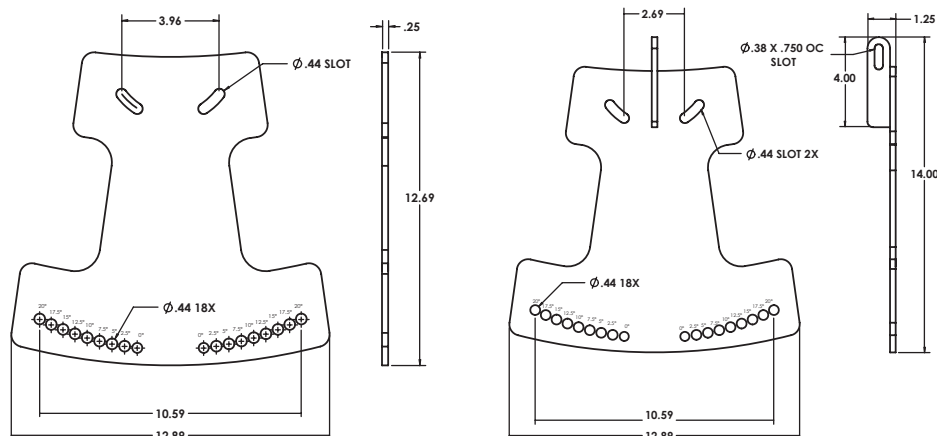

**Color:** Black

**Design Factor:** 5:1 ratio

**WLL:** 400 lbs

## OPTIONAL ACCESSORIES:
