

# WP-16

STUD ADAPTER - FOR WOOD AND METAL WALL STUDS

# 120 lb WLL

STUD MOUNT

Stud Adapter shown with SM-075-ASB

## WALL STUD ADAPTER ON 16" CENTERS

The wall stud adapter plate is used to bridge two structural studs offering a secure surface mounting for specific Allen Products mounting designs including SocketMount, Steerables Wall Mount, Multimount 120 and more. It bridges both standard 16" wood and metal construction wall stud spacing.

The wall stud adapter plate is made from rugged alloy steel with two horizontal flanges for added rigidity. The assembly is finished with a baked-on powder coat paint.

The WP-16 may be mounted over dry wall, plaster and other wall materials, as long as it is anchored into the structure. It can even be embedded underneath the wall material for a clean appearance.
